OMAR C. CORPUS

I am an enthusiastic web developer who holds a software development degree from the University of Colima. My area of expertise is web development with React and NodeJS. I am a fully bilingual and passionate team player, ready to integrate into any team.

EXPERIENCE

Web Developer

at Enroute Systems | from May 2022 - February 2023

- Implemented user interfaces, integrated data endpoints, and tested components for functionality and error prevention.
- Developed and maintained features for the "Master Key" project, a web application used for data management within the company. This project utilized NX, React, GraphQL, and Sequelize.
- Contributed to a curriculum PDF generator tool, a React app used by HR to create CVs for potential clients. This tool used custom React form components, Formik for form validation, and CSS with ReactPDF for PDF generation.
- Worked on the front-end of a team management application for team leaders, which utilized Enroute's employee API to display relevant team member information.
- Collaborated with the UX/UI team to create a UI kit for project use.
- Ensured thorough testing of each React component using Jest.

Decidim Monterrey, "Presupuesto Participativo para el municipio de Monterrey"

at Codeando Mexico | from January - March 2022

- Collaborated with [Codeando Mexico](#), and the city of Monterrey's government to create a citizen budget participation platform. This platform allows any registered member of the city to propose a use for the city's budget towards projects that benefit their community.
- Conducted front-end work by creating user interfaces based on Figma designs provided by Monterrey's team.
- As of 2023, 30 proposals have been approved by the city out of the more than 150 citizen proposals that were registered in May 2022. You can view the approved proposals at: <https://decidimos.monterrey.gob.mx/processes/presupuesto-participativo2023/f/60/>.
