English - Native
Spanish - Native

I am an enthusiastic software engineer who holds a software development degree from the University of Colima. My area of expertise is web development with React and NodeJS. I am a fully bilingual and passionate team player, ready to integrate into any team.

EXPERIENCE

Full-Stack Developer

at [Enroute Systems](#) (CONSULTORY) | from May 2022 - February 2023

- Created a team management app for leaders using Enroute's employee API to display important team member information. **NX** and **React** for the user interface, and **GraphQL** and **Sequelize** for data management.
- Developed a curriculum PDF generator tool for HR to present team candidates to clients. Includes features such as form validation, custom input components, PDF styles, and data formatting. Allows PDF creation, edits, and download. **React**, **Formik**, **Tailwind**, and **ReactPDF**.
- Worked with the UX/UI team to create high-quality components for the company's UI kit, used in various projects. Ensured thorough testing of each React component for proper functionality and error prevention. Our work on the UI kit was a key factor in the company's strong brand. Used **React**, **Tailwind**, and **Jest**.

Front-End Developer

at [Codeando Mexico](#) | from January - March 2022

- Collaborated with the Monterrey city government to create a platform for citizen budget participation. A platform that allows any registered member of the city to propose a use for the city's budget towards projects that benefit their community. View project [here](#)
- Implemented user-friendly interfaces based on designs provided by the Monterrey team. Ensured privacy and security through form validation, email verification, and incorporated multi-language support.
- Successfully developed a document submission feature that allows citizens to undergo verification by government officials.
- Facilitated the approval of 30 out of over 150 citizen proposals registered in May 2022. The approved proposals can be viewed [here](#).

FREELANCE / PROJECTS

- Chavez Hardware Store UI, wanabana.io: **React**, **Formik**, **Redux**
- [Financial Tracker](#): **React**, **ContexAPI**, **Bootstrap**.
- Student Dropout Predictor, IHCLab: **Machine Learning**, **Python**
- [Nutrition Kids Game](#), LudoLab: **Python**

EDUCATION / CERTIFICATION

- English TOEFL certification, Level C2 - Proficient
- BRIGHT CODERS, WEB DEVELOPMENT [BOOTCAMP]
- Software Engineer - Universidad de Colima
- Analyst Programmer - Universidad de Colima
